

POSITION DESCRIPTION

Title:	Senior Application Engineer	Location:	Abu Dhabi
Department:	Administration	Reports to:	IT Manager
Prepared by:	CAMO	Date:	February 2014

Overall Purpose:

Responsible for supporting key business-critical applications within the organization.

Roles and Responsibilities

Major responsibilities and target accomplishments expected of the position including the typical problems encountered in carrying out the responsibilities:

- Provision, configure, deploy, and support our suite of customized applications, as well as their supporting tools and services.
- Develop and maintain a deep understanding of how the entire suite of National Ambulance products is developed, deployed, and supported.
- Coordinate with the Technical Operations team as one of a limited number of technical professionals with administrative access to our production 24x7 operations infrastructure, including Critical Services.
- Serve as technical lead within the Professional Services organization by acting as the escalation point for issues arising from Local and Remote users and other functional areas within the company.
- Quickly understand how to meet customer needs, develop solutions to those needs, and educate other personnel within Cayuse about how to integrate those solutions into the overall service delivery model.
- Work with the Manager of Professional Services to continuously define and improve a wide spectrum of processes utilized by the Operational Services team.
- Gain an understanding of the functionality and technical constraints of our software. Communicate these to Subject Matter Experts.
- Collaborate closely with the Developer and Quality Assurance teams to improve processes and technology supporting deployment and maintenance of National Ambulance applications.
- Ensure all work is done in compliance with ISO, ADHICS and other UAE and Abu Dhabi information security regulations as required by UAE Law.
