

## General Guidance on Critical Level for BLS Drug Bag

### Quick reference Sheet for BLS Drug Bag

- Glyceryl Trinitrate 0.4mg (GTN Spray 200 per Bottle)
  - 1 spray = 0.4mg = 1 Dose
  - Number of sprays = Number of Doses logged
- Paracetamol 120mg/5ml
  - Log the dose used in milligrams
  - E.g. 120mg = Log as 120 used
- When completing an inventory check, for the 2 items above, use the **last quantity amount**
- After submitting a request that includes Drug items, you must go back to Inventory and Save
  - The current drug holding should be shown correctly → Press Save
- If there is a discrepancy in terms of Last Qty and/or Actual on hands, please complete the Medication Discrepancy Form
- For items with large par levels (like the paracetamol liquid) click in the field and use the stylus and keyboard to enter the number
